

Modifications to the Victorian ranking systems

Victorian Tournament Ranking

Continue with current system but add 25% of the “Rankings for Pennant, Reserve, Willis, Reserve Grade Snooker” points to the current tournament ranking points. (the percentage can be reviewed at the end of the year)

Currently ranked players and the effect the new system would have:

Name	Tourn rank current	Tourn Rank points	Weekly rank points	Weekly rank	25% weekly points	Total	New Vic Rank
Adrian Ridley	1	10918	0	0	0	10918	1
Aaron Mahoney	2	8415	8568	1	2142	10557	2
Kurt Dunham	3	7128	7431	7	1858	8986	3
Charlie Chafe	5	6208	7594	6	1899	8107	4
Josh Gorski	6	5973	6790	15	1698	7671	5
Rudy Sulaeman	4	6490	3890	75	973	7463	6
Stan Gorski	7	5263	6435	23	1609	6872	7
Paul Thomerson	13	3590	8363	2	2091	5681	
Kevin Xu	28	2565	8358	3	2090	4655	

Rankings do not change a lot but it rewards the player that play weekly, any player that plays twice weekly will be further rewarded. Rudy Sulaeman has not played weekly in the last year and therefore drops from 4 to 6. Have included Paul Thomerson and Kevin Xu at the bottom of the list as both generally play 2 nights a week, while Paul has had some good results in tournaments, Kevin does not play all the tournaments. Under the new system both Paul and Kevin would move up the rankings because of their contribution in weekly play.

Weekly ranking points

Ranking points for the Billiards and Willis should increase to the same or very similar to the pennant season (currently half points). This would affect the tournament ranking points a little more. Please Note: to make this change it would have to be retrospective because of the way the database calculates ranking points.

In a nutshell

Tournament ranking points will be modified to include 25% of the points earned playing weekly

Weekly ranking points system will continue with a view to developing “MVP” awards or something similar.

Have any suggestions or ideas that we should include in the system?
